INTRODUCTION

This report presents the results of the Special Eurobarometer survey on the “Future of Europe”, with a special focus on questions dealing with social issues.

The survey was carried out between 23 September and 2 October 2017 and interviews were conducted in the 28 Member States of the European Union (EU). The full report, of which the present report is an extract, is the seventh in the “Future of Europe” series, and follows from previous surveys in 2006¹, 2009², 2011³, 2012⁴, 2014⁵ and 2016⁶.

This survey was conducted after that the European Commission released a White paper on the “Future of Europe”⁷, setting out challenges and opportunities for Europe in the coming decade.

On 26 April 2017, the European Commission published a reflection paper on the social dimension of Europe⁸, which represents a contribution to the debate on how to sustain the Europeans’ standards of living, and how to address major issues in the social and employment fields. The reflection paper followed a public consultation on the European Pillar of Social Rights, culminating in a concluding conference in January 2017.

The joint proclamation of the European Pillar of Social Rights⁹ by the European Parliament, the Council and the European Commission on 17 November 2017, at the occasion of first Social Summit in 20 years¹⁰ (initiated by President of the European Commission Jean-Claude Juncker and Sweden’s Prime Minister Stefan Löfven), represents a new milestone.

The first chapter of this report considers citizens’ views of the EU, with particular attention paid to the place of social issues in the European Union. This includes respondents’ opinions about the EU’s main assets. Citizens’ views of the main challenges facing the EU are also considered as well as their preferences for European society in 2030.

The second chapter focusses on Europeans’ views on social issues, and in particular, views about social protection and citizens’ opportunities to succeed in life. Citizens’ levels of satisfaction with various facets of their life will be considered, as will their expectations on the harmonisation of social welfare systems within the EU and on European decision-making in the area of health and social security.

In the final chapter, the focus shifts to Europe’s future, particularly in relation to the prospects for young people in the Europe of the future and the factors that would be most helpful for Europe’s future.

The methodology used is that of the Standard Eurobarometer surveys carried out by the Directorate-General for Communication (“Media monitoring and analysis” Unit)¹¹. It is the same for all countries and territories covered in the survey. A technical note concerning the interviews conducted by the member institutes of the TNS Opinion & Social network is annexed to this report. It also specifies the confidence intervals¹².

Note: In this report, countries are referred to by their official abbreviation. The abbreviations used in this report correspond to:

Belgium	BE	Lithuania	LT
Bulgaria	BG	Luxembourg	LU
Czech Republic	CZ	Hungary	HU
Denmark	DK	Malta	MT
Germany	DE	The Netherlands	NL
Estonia	EE	Austria	AT
Ireland	IE	Poland	PL
Greece	EL	Portugal	PT
Spain	ES	Romania	RO
France	FR	Slovenia	SI
Croatia	HR	Slovakia	SK
Italy	IT	Finland	FI
Republic of Cyprus	CY *	Sweden	SE
Latvia	LV	United Kingdom	UK
European Union – weighted average for the 28 EU Member States			EU28

** Cyprus as a whole is one of the 28 European Union Member States. However, the ‘acquis communautaire’ has been suspended in the part of the country which is not controlled by the government of the Republic of Cyprus. For practical reasons, only the interviews carried out in the part of the country controlled by the government of the Republic of Cyprus are included in the ‘CY’ category and in the EU28 average.*

*We wish to thank the people throughout the European Union
who have given their time to take part in this survey.*

Without their active participation, this study would not have been possible.

¹² The results tables are annexed. It should be noted that the total of the percentages indicated in the tables in this report may exceed 100% when the respondent was able to choose several answers to the same question.

KEY FINDINGS

The European Union and social issues

- More than one fifth of the respondents mention the standard of living of EU citizens (22%) as one of the EU's main assets.
- At least one quarter consider the EU's respect for democracy, human rights and the rule of law (31%), the economic, industrial and trading power of the EU (30%) and the good relationship between the EU's Member States (25%) as the EU's main assets.
- Respondents consider the main challenges facing the EU to be unemployment (39%) and social inequalities (36%).
- Respondents are less likely to mention unemployment than they were in 2016 (-6 percentage points).
- To face major global challenges, 45% think social equality and solidarity should be emphasised.
- 35% say protecting the environment, 30% mention progress and innovation and 23% say free trade/market economy should be emphasised.
- Respondents prefer a Europe in 2030 where more importance is placed on solidarity (62%) than individualism (13%), while 18% prefer that both have equal importance.

Europeans' views on social issues

- More than nine in ten respondents (91%) agree they are happy with their family life and 64% are happy with their current occupation. Large majorities also agree they are happy living in the country they currently live in (89%) or in the EU (78%).
- A large majority of respondents agree the free-market economy should go with a high level of social protection (83%), with more than one third totally agreeing (38%).
- Just over half of all respondents agree that in their country everyone has a chance to succeed in life (51%), an increase of five percentage points since 2016.
- The majority (60%) support more European-level decision-making in dealing with health and social security issues. Around one third (32%) think the opposite.
- More than six in ten respondents (64%) are in favour of the harmonisation of social welfare systems within the European Union, with 19% saying they are strongly in favour.

The future of Europe

- Two thirds of respondents agree the European Union project offers a future perspective for Europe's youth (66%), an increase of six percentage points since 2016.
- A majority of respondents think the life of today's children in the EU will be more difficult than the life of those from their own generation (54%).
- The majority think comparable living standards would be most helpful for the future of Europe (52%), and more than one third mention comparable education standards (35%).

I. THE EUROPEAN UNION AND SOCIAL ISSUES

This chapter considers the opinions of and perceptions about the EU, including its assets, values and challenges. Views about the EU as a place of stability in the world and perceptions about globalisation are also discussed.

1 The EU's main assets

- Around one fifth consider the standard of living of EU citizens as one of the EU's main assets -

Respondents were asked what they thought were the main assets of the EU. They were able to give two answers¹³.

The chart below shows the overall results for all answers (first and second mentioned assets).

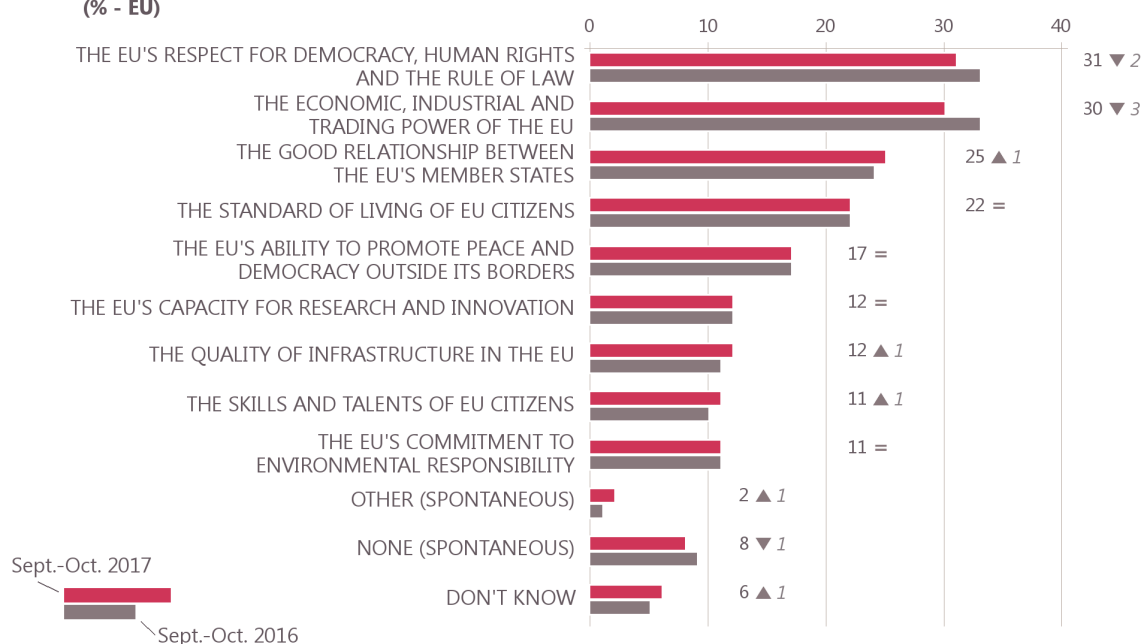

Around one fifth of the respondents (22%) mention the **standard of living of EU citizens** as one of the EU's main assets.

This answer is less frequently-mentioned than **the EU's respect for democracy, human rights and the rule of law** (31%) or **the economic, industrial and trading power of the EU** (30%). One quarter say also the **good relationship between the EU's Member States** (25%) is one of the main assets of the EU.

Nonetheless, the standard of living of EU citizens is still more frequently-mentioned than **the EU's ability to promote peace and democracy outside its borders** (17%), the **EU's capacity for research and innovation** and **the quality of infrastructure in the EU** (both 12%), and **the skills and talents of EU citizens** and **the EU's commitment to environmental responsibility** (both 11%).

The results for all the assets tested have generally remained stable, with no change at all taking place for the proportion mentioning *the standard of living of EU citizens*.

QC1T In your opinion, what are the main assets of the EU? Firstly? And secondly? (MAX. 2 ANSWERS)
(% - EU)

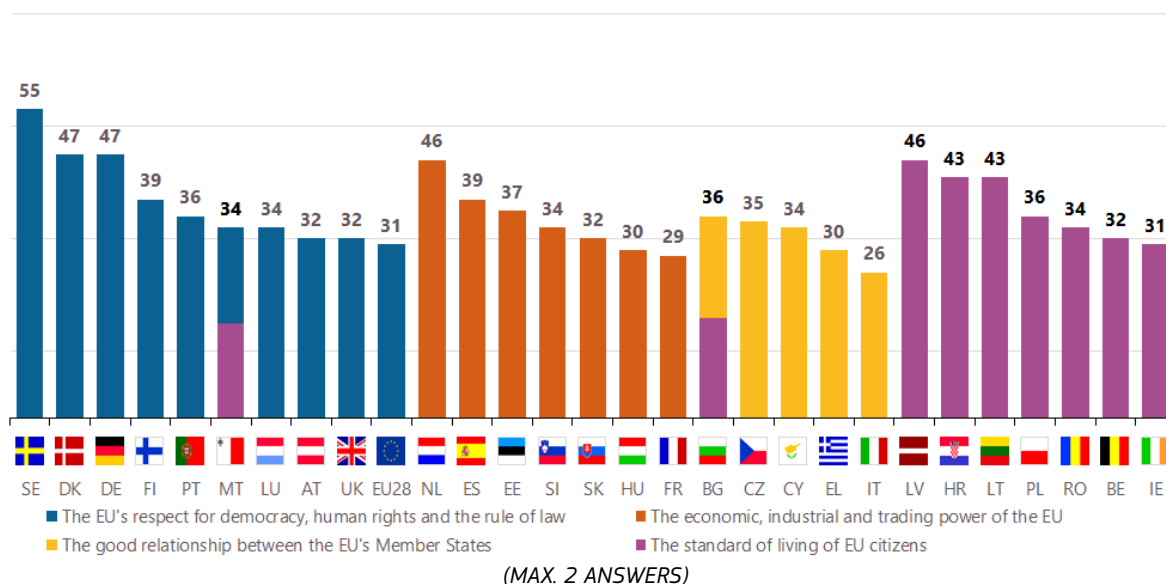

¹³ QC1T In your opinion, what are the main assets of the EU? Firstly? And secondly? (MAX. 2 ANSWERS)

Respondents living in EU Member States outside the euro area are more likely to mention *the standard of living of EU citizens* as a main asset, compared to those in the euro area (28% vs. 19%).

Across the EU as a whole, there are seven Member States where respondents are most likely to say *the standard of living of EU citizens*: Latvia (46%), Croatia and Lithuania (both 43%), Poland (36%), Romania (34%), Belgium (32%) and Ireland (31%). In Bulgaria, respondents are most likely to mention both *the standard of living of EU citizens* and *the good relationship between the EU's Member States* (36%). In Malta, *the standard of living of EU citizens* and *the EU's respect for democracy, human rights and the rule of law* are both the most mentioned assets by the respondents (34%).

QC1T In your opinion, what are the main assets of the EU? Firstly? And secondly?
(% - THE MOST MENTIONED ANSWER BY COUNTRY)

Apart from the seven countries in which respondents are the most likely to mention this asset, *the standard of living of EU citizens* is mentioned by at least one quarter of respondents in Slovenia (33%), Estonia (27%), Austria, the Czech Republic and Slovakia (all 29%), Estonia and Luxembourg (both 27%) and Hungary (25%). Respondents in Sweden (8%), Italy (13%) and Greece (15%) are the least likely to mention this.

QC1T In your opinion, what are the main assets of the EU? Firstly? And secondly?

3rd MOST FREQUENTLY MENTIONED ITEM										

2 The EU's main challenges

- Respondents consider unemployment the main challenge faced by the EU -

Respondents were asked to identify up to three main challenges currently faced by the EU¹⁴. As it was the case in 2016, **unemployment** is most likely to be regarded as the main challenge (39%), although respondents are now less likely to mention it (-6 percentage points).

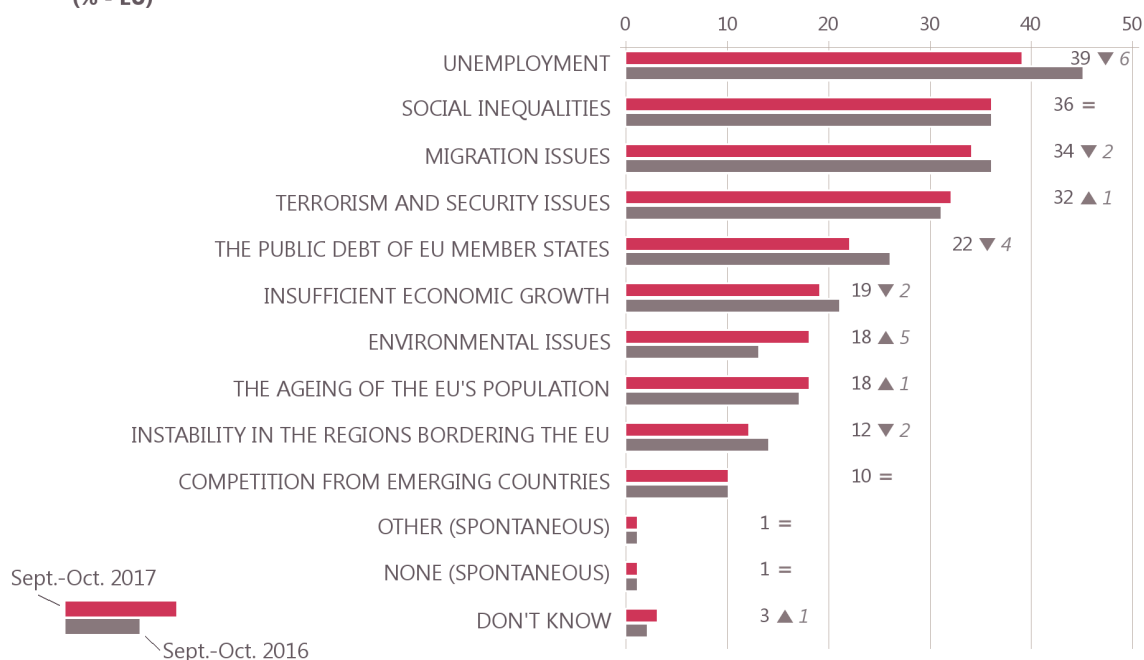

More than one third consider **social inequalities** (36%) and **migration issues** (34%) to be the main challenges for the EU, while just over three in ten (32%) mention **terrorism and security issues**.

Just over one in five say **the public debt of EU Member States** is one of the EU's main challenges (22%), while 19% mention **insufficient economic growth** and 18% mention **environmental issues** or **the ageing of the EU's population**.

At least one in ten respondents say **instability in the regions bordering the EU** (12%), or **competition from emerging countries** (10%) are the main challenges currently faced by the EU.

As well as a decline in the mentions of *unemployment*, respondents are also less likely to mention *the public debt of EU Member States* than they were in 2016 (-4 percentage points). However, they are more likely to mention *environmental issues* (+5).

QC2 Which of the following do you think are the main challenges for the EU? (MAX. 3 ANSWERS)
(% - EU)

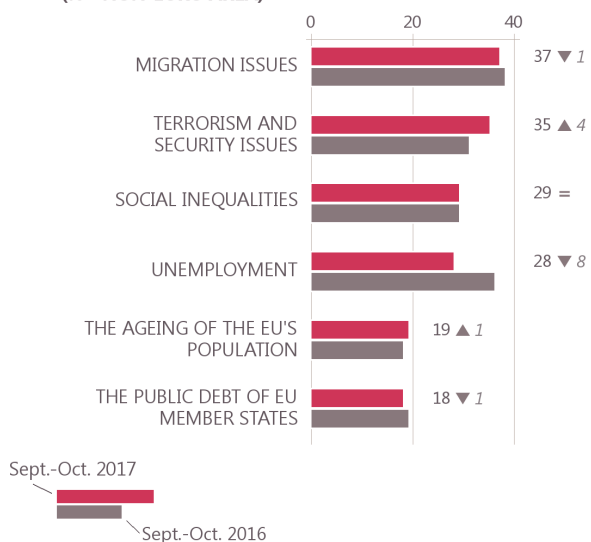

¹⁴ QC2 Which of the following do you think are the main challenges for the EU? (MAX. 3 ANSWERS)

There are several notable differences between euro and non-euro area countries. Respondents **in the euro area** are much more likely to say *unemployment* is one of the EU's main challenges, compared to those outside the euro area (44% vs. 28%). Those within the euro area are also more likely to say *social inequalities* (39% vs. 29%)

QC2 Which of the following do you think are the main challenges for the EU? (MAX. 3 ANSWERS)
(% - EURO AREA)

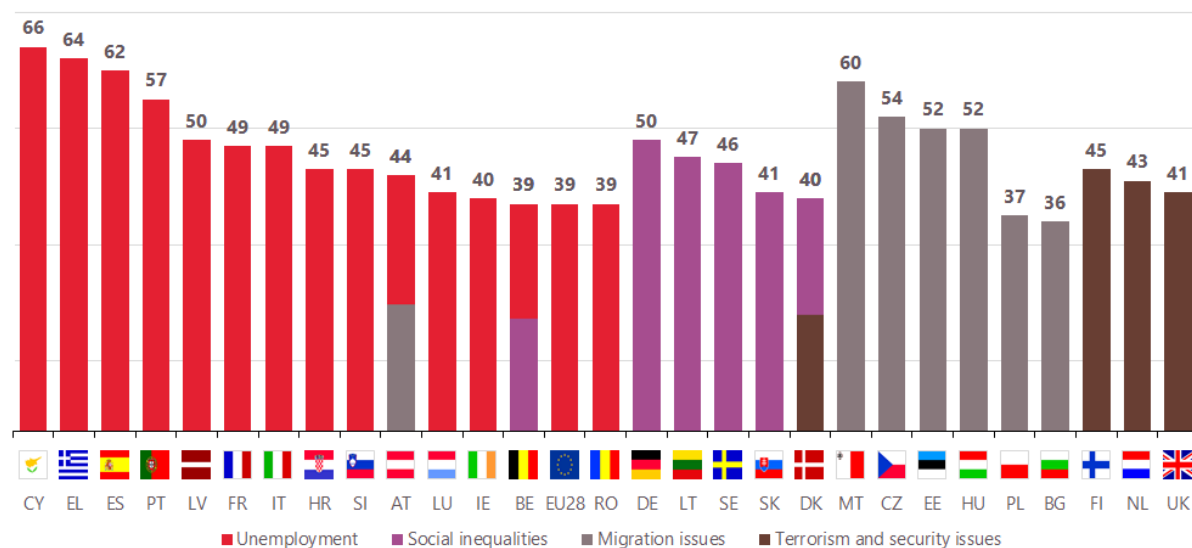

QC2 Which of the following do you think are the main challenges for the EU? (MAX. 3 ANSWERS)
(% - NON-EURO AREA)

In 12 EU Member States, respondents are most likely to say *unemployment* is one of the main challenges for the EU. In four countries, respondents are most likely to mention *social inequalities*.

QC2 Which of the following do you think are the main challenges for the EU? (MAX. 3 ANSWERS)
(% - THE MOST MENTIONED ANSWER BY COUNTRY)

Respondents in Cyprus (66%), Greece (64%) and Spain (62%) are most likely to say *unemployment* is one of the main challenges for the EU, compared to 19% in the Netherlands, 20% in the Czech Republic and 21% in Denmark.

In 25 EU Member States, respondents are now less likely to consider *unemployment* as one of the EU's main challenges than they were in 2016, with a decrease of at least ten points in 12 countries, and the largest declines observed amongst those in Poland (29%, -17 percentage points), Finland (36%, -16) and Slovakia (34%, -15). Respondents in Belgium and Romania, on the other hand, are now more likely to mention this. There is no change in Malta.

Social inequalities are most widely considered a challenge by respondents in Portugal (54%), Germany (50%), Latvia and Lithuania (both 47%), and least likely to be mentioned by those in Malta (16%), Italy (22%) and the United Kingdom (24%).

In 14 countries, respondents are less likely to mention *social inequalities*, especially in Spain (40%, -11 percentage points), while those in eight countries are now more likely to do so. There is no change in six countries.

The **socio-demographic analysis** shows no notable differences based on gender, age or occupation, but does highlight the following:

- The longer respondents remained in education, the more likely they are to mention *social inequalities* (39% who completed education aged 20 and over, compared to 32% of those who completed education prior to age 16). The opposite pattern can be observed for those who mention *unemployment* as one of the main challenges of the EU (47% of those who completed their education aged 15 and before, compared to 34% who completed education aged 20 and over);
- The more financial difficulties respondents experience, the more likely they are to mention *unemployment* (51% of those who have trouble paying their bills most of the time, compared to 35% with the least financial difficulties);
- Respondents who consider themselves working class are the most likely to mention *unemployment*, particularly compared to those who classify themselves as upper class (45% vs. 21%).

3 The EU vis-à-vis major global challenges: where should the emphasis lie?

- Social equality and solidarity should be emphasised to face major global challenges -

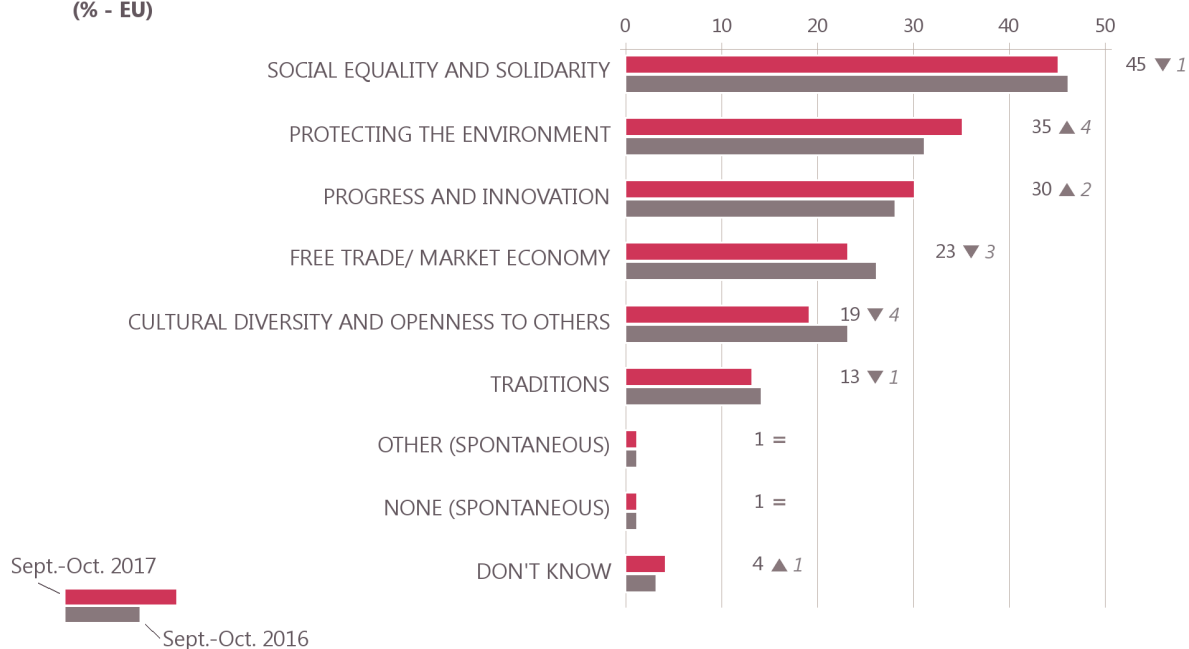

Respondents were asked to identify up to two areas they thought should be emphasised by society in order to face major global challenges¹⁵. More than two in five (45%) mention **social equality and solidarity**.

Just over one third (35%) say **protecting the environment** should be emphasised, while 30% mention **progress and innovation** and 23% say it should be **free trade/market economy**. Almost one in five mention **cultural diversity and openness to others** (19%).

Respondents are least likely to say **traditions** should be emphasised by society in order to face major global challenges (13%).

Compared to the last survey in 2016, respondents are now more likely to mention *protecting the environment* (+4 percentage points) and *progress and innovation* (+2), but they are less likely to mention *cultural diversity and openness to others* (-4) or *free trade/market economy* (-3), and also slightly less likely to cite *social equality and solidarity* (-1) and *traditions* (-1).

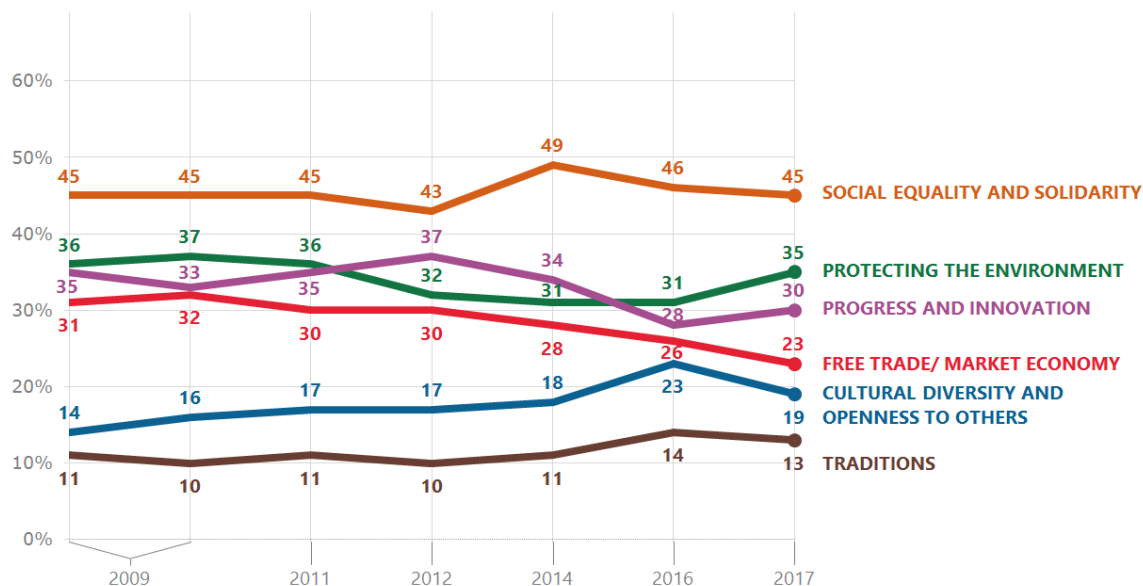

QC3 From the following items, which two should our society emphasise in order to face major global challenges? (MAX. 2 ANSWERS)
(% - EU)

¹⁵ QC3 From the following items, which two should our society emphasise in order to face major global challenges? (MAX. 2 ANSWERS)

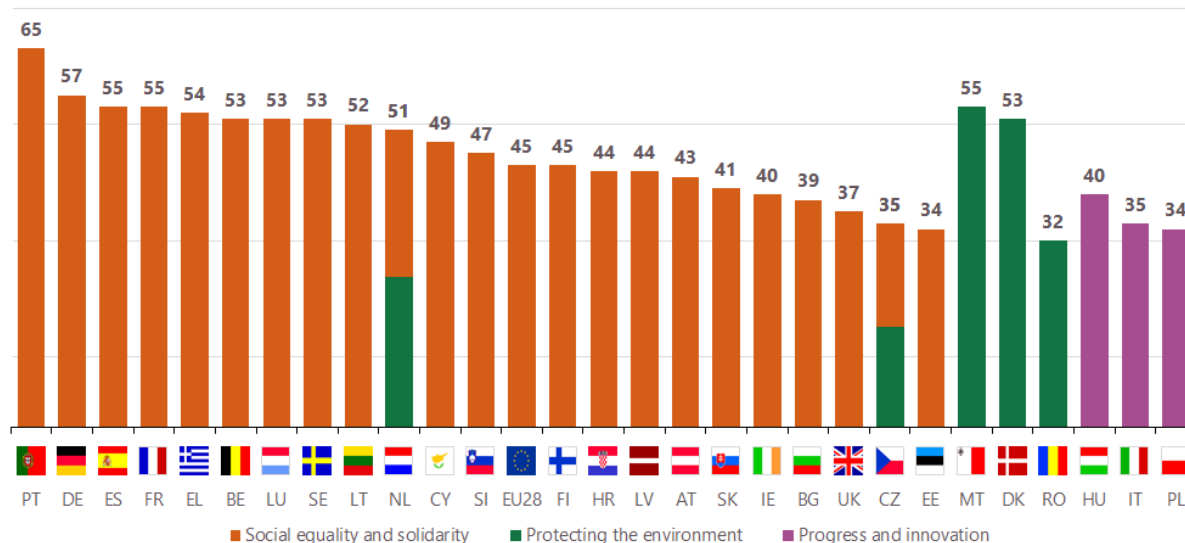

The longer-term trends show the proportion who mention *free trade/market economy* continues to decline, and is now at its lowest point, while the proportion mentioning *social equality and solidarity* has returned to the levels of 2009-2011.

QC3 From the following items, which two should our society emphasise in order to face major global challenges?
(MAX. 2 ANSWERS)
(% - EU)

In 20 EU Member States, respondents are most likely to say *social equality and solidarity* should be emphasised in order to face global challenges. In the Netherlands and the Czech Republic *social equality and solidarity* and *protecting the environment* are equally mentioned.

QC3 From the following items, which two should our society emphasise in order to face major global challenges?
(MAX. 2 ANSWERS)
(% - THE MOST MENTIONED ANSWER BY COUNTRY)

In ten countries, more than half of all respondents think *social equality and solidarity* should be emphasised in order to face major global challenges. Respondents in Portugal (65%), Germany (57%) and Spain and France (both 55%) are the most likely to say it, while those in Italy (27%), Romania (30%) and Poland and Hungary (both 33%) are the least likely to do so.

As with evolutions at country-level, there has been a decline since 2016 in the proportion who say *social equality and solidarity* should be emphasised in order to meet global challenges in 19 countries, with the largest decreases observed amongst respondents in Cyprus (49%, -11 percentage points), Bulgaria (39%, -8), Spain (55%, -7) and Italy (27%, -7). Increases are observed in seven EU Member States, with the largest one in the United Kingdom (37%, +4). No change in France and the Netherlands.

4 European societies in 2030: solidarity vs. individualism

- Respondents prefer Europe in 2030 to place more importance on solidarity than individualism –

Respondents were asked whether they would prefer a European society in 2030 where more importance is given to solidarity or to individualism¹⁶. More than six in ten (62%, +1 percentage point since 2012) **prefer more importance be given to solidarity**, while 13% (no change) **prefer individualism**. Almost one in five (18%, +1) spontaneously **prefer a society where both have equal importance**.

QC12 Let's now talk about your hopes for the future. In 2030, in the European Union, would you prefer a society where more importance is given to solidarity, or to individualism?
(% - EU)

(Sept.-Oct. 2017 - Nov.-Dec. 2012)

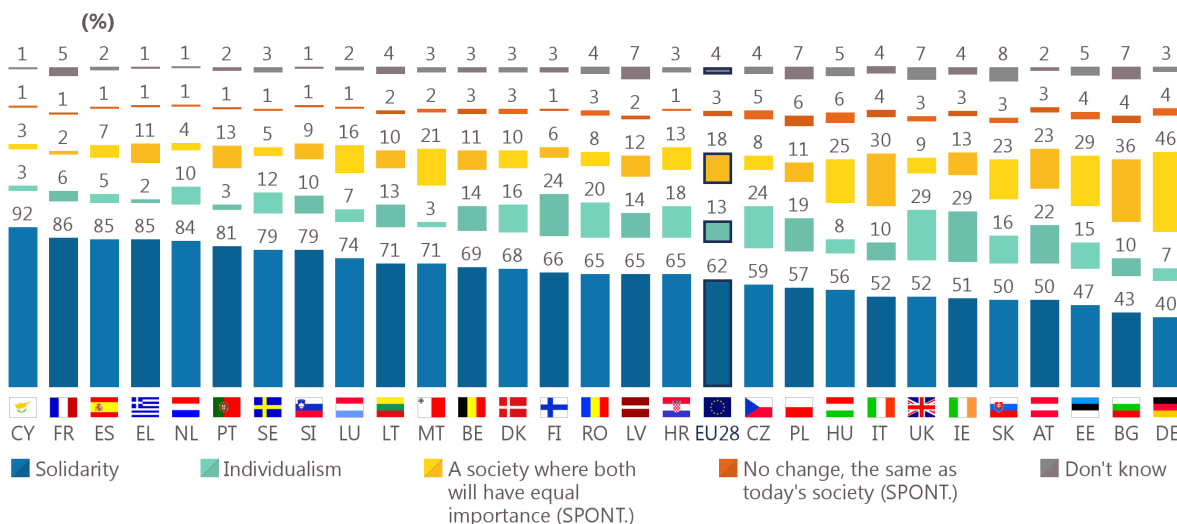

Respondents **in the euro area** are more likely to *prefer solidarity* compared to those living outside the euro area (65% vs. 57%), and they are also more likely to spontaneously prefer equal importance is given to both (21% vs. 11%). Respondents living **outside the euro area** are, however, more likely to *prefer individualism* (22% vs. 8%).

¹⁶ QC12 Let's now talk about your hopes for the future. In 2030, in the European Union, would you prefer a society where more importance is given to solidarity, or to individualism?

In all EU Member States but Germany, respondents are most likely to *prefer a society in 2030 where more importance is placed on solidarity*. Those living in Cyprus (92%), France (86%) and Spain and Greece (both 85%) are the most likely to say this, compared to 40% in Germany, 43% in Bulgaria and 47% in Estonia.

Respondents in the United Kingdom and Ireland (both 29%) are the most likely to *prefer more importance is given to individualism*, while respondents are the most likely to *prefer both have equal importance* in Germany (46%, in first position before solidarity) and Bulgaria (36%).

QC12 Let's now talk about your hopes for the future. In 2030, in the European Union, would you prefer a society where more importance is given to solidarity, or to individualism?

Compared to 2012, respondents in 16 EU Member States are now more likely to *prefer a society with more importance placed on solidarity*, with the highest increases in Austria (50%, +25 percentage points), Portugal (81%, +23), Hungary (56%, +18), Latvia (65%, +16) and Bulgaria (43%, 15). In 11 countries, respondents are now less likely to say this, most notably in Estonia (47%, -19). No change in Belgium.

In 14 countries, respondents are now more likely to *prefer the importance is placed on individualism*, especially in Romania (20%, +11 percentage points), the Czech Republic (24%, +11) and Croatia (18%, +9). They are less likely to do so in 12 countries, most notably in Italy (10%, -8). No variation in Spain and Latvia.

In 16 EU Member States, respondents are now less likely to *prefer a society in 2030 where both solidarity and individualism have equal importance*, with the strongest decreases in Austria (23%, -26 percentage points), Latvia (12%, -16), Slovenia (9%, -12) and Bulgaria (36%, -12). In nine Member States of the EU, respondents are now more likely to say this, most notably in Estonia (29%, +16) and Luxembourg (16%, +10). No change in Spain, Sweden and Cyprus.

QC12 Let's now talk about your hopes for the future. In 2030, in the European Union, would you prefer a society where more importance is given to solidarity, or to individualism?

II. EUROPEANS' VIEWS ON SOCIAL ISSUES

This second chapter of the report focusses Europeans' views on social and societal issues. Levels of satisfaction with various facets of their life will be considered, as will the views respondents have about the rise of anti-establishment parties in Europe. Respondents' opinions about social protection, citizen's opportunities to succeed in life, the involvement of the EU in health and social security issues and their expectations on the harmonisation of social welfare systems within the EU will also be discussed.

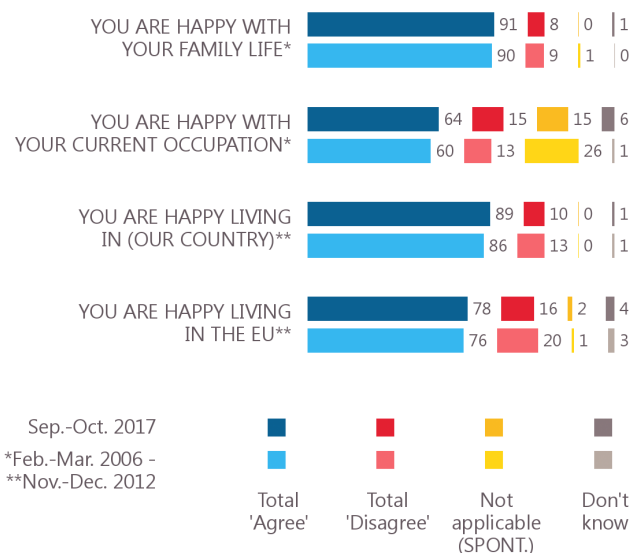

1 Are Europeans happy?

- The majority of respondents are happy with their family life, occupation, life in the country they live in and life in the EU -

Respondents were asked whether they were happy with their family life, their current occupation, living in the country they live in and living in the EU¹⁷. More than nine in ten (91%) agree they are **happy with their family life** and 64% **are happy with their current occupation**. Large majorities also agree they are **happy living in their country** (89%) or **happy living in the EU** (78%).

The trend results show relatively small changes. Compared to 2006¹⁸, respondents are now more likely to agree they are *happy with their current occupation* (+4 percentage points), and slightly more likely to agree they are *happy with their family life* (+1). Compared to 2012, respondents are slightly more likely to agree they are *happy living in their country* (+3) or *happy living in the EU* (+2).

QC15 Please tell me to what extent you agree or disagree with each of the following statements.
(% - EU)

Respondents living in the euro area are more likely to agree they are happy living in the EU compared to those who live outside the euro area (81% vs. 72%).

Each of these four statements will be considered in turn in the following sections.

¹⁷ QC15 Please tell me to what extent you agree or disagree with each of the following statements. You are happy with your family life; You are happy with your current occupation; You are happy living in (OUR COUNTRY); You are happy living in the EU.

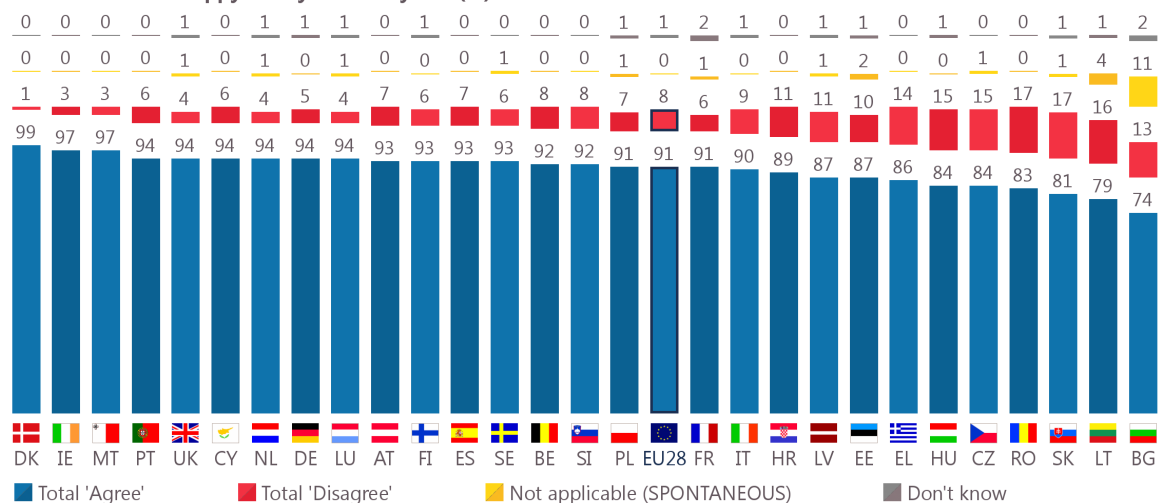

¹⁸ Results from 2006 cover EU25 (excl. Croatia, Romania and Bulgaria).

a. Satisfaction with their family life

More than seven in ten respondents in each EU Member State agree they are **happy with their family life**. Proportions range from 99% in Denmark and 97% in Ireland and Malta to 74% in Bulgaria, 79% in Lithuania and 81% in Slovakia.

QC15.1 Please tell me to what extent you agree or disagree with each of the following statements.

You are happy with your family life (%)

In most countries, results have remained relatively stable since 2006, but there are some exceptions. For example, respondents in Austria (93%, +9 percentage points) and Latvia (87%, +9) are now more likely to agree they are *happy with their family life*, while those in Greece (86%, -6) are now less likely to do so.

*This question was not asked in Bulgaria, Croatia and Romania in 2006

The **socio-demographic analysis** illustrates the following:

- The longer respondents remained in education, the more likely they are to agree they are *happy with their family life*: 94% who completed education aged 20 and after agree, compared to 87% who completed education aged 15 or before;
- Managers (96%) and other white-collar workers (95%) are the most likely to agree, particularly compared to the unemployed (83%);
- The fewer financial difficulties the respondents experience, the more likely they are to agree: 95% who experience the least difficulties paying bills do so, compared to 77% who experience the most.

QC15.1 Please tell me to what extent you agree or disagree with each of the following statements.

You are happy with your family life (% - EU)

b. Satisfaction with their current occupation

In all but four countries, at least half of all respondents agree they are **happy with their current occupation**, with respondents in Ireland (84%), Denmark (81%) and Austria (79%) the most likely to say this. The exceptions are respondents in Greece (37%) and Bulgaria, France and Cyprus (all 49%). However, in these four Member States of the EU, respondents feeling *happy with their current occupation* also form a majority.

Respondents in Greece (26%), Romania (24%) and Italy (23%) are the most likely to disagree.

QC15.2 Please tell me to what extent you agree or disagree with each of the following statements.

Compared to 2006, respondents in Poland (64%, +24 percentage points), Hungary (66%, +22) and Malta (54%, +15) are now much more likely to agree they are *happy with their current occupation*. Overall, respondents in 19 EU Member States are now more likely to agree. In contrast, respondents in five countries are now less likely to agree they are *happy with their current occupation*, with the highest decreases in Spain (72%, -13), in Italy (54%, -10) and in Greece (37%, -7). No change in Cyprus.

QC15.2 Please tell me to what extent you agree or disagree with each of the following statements.
You are happy with your current occupation (%)

c. Satisfaction with life in their country

More than six in ten respondents in each EU Member State agree they are **happy living in their country**. Proportions range from 99% in Denmark, 98% in Ireland and 97% in both the Netherlands and Sweden to 62% in Hungary, 66% in Bulgaria and 67% in Romania.

QC15.3 Please tell me to what extent you agree or disagree with each of the following statements.

You are happy living in (OUR COUNTRY) (%)

Compared to 2012, respondents in 19 Member States of the EU are now much more likely to agree they are *happy living in their country*, and notably in Portugal (94%, +28 percentage points), Hungary (62%, +26), Estonia (92%, +14) and Ireland (98%, +12). In only five countries respondents are now less likely to agree, the largest decline in agreement being observed amongst respondents in Croatia (82%, -7). Opinion is unchanged in France, Germany, Belgium and Luxembourg.

d. Satisfaction with life in the European Union

More than half of the respondents in each EU Member State say they are **happy living in the European Union**. Respondents in Luxembourg (97%), Ireland (94%) and the Netherlands and Denmark (both 92%) are the most likely to agree, while those in Hungary (57%), the Czech Republic (58%) and Romania and Greece (both 62%) are the least likely to do so.

QC15.4 Please tell me to what extent you agree or disagree with each of the following statements.

You are happy living in the EU (%)

In 20 countries, respondents are now more likely to agree they *are happy living in the EU* than they were in 2012, with the largest increases observed amongst respondents in Portugal (83%, +31 percentage points), Hungary (57%, +26) and Cyprus (75%, +21). In contrast, respondents in five EU Member States are now less likely to agree, most notably in Slovakia (78%, -7). Opinion is stable in Sweden and Bulgaria.

*This question was not asked in Croatia in 2012

The **socio-demographic analysis** illustrates the following:

- Respondents aged 15-24 are the most likely to agree they are *happy living in the EU*, particularly compared to those aged 55 and over (82% vs. 75%);
- The longer respondents remained in education, the more likely they are to agree: 86% who completed education aged 20 and after agree, compared to 66% who completed education aged 15 or before;
- The fewer financial difficulties respondents experience, the more likely they are to agree: 83% who experience the least difficulties do so, compared to 58% who experience the most;
- The higher respondents place themselves on the class scale, the more likely they are to agree: 94% who classify themselves as upper class do so, compared to 71% who say they are working class;
- Respondents who have a positive image of the EU are much more likely to agree they are *happy living in the EU* (94%), compared to those with a neutral (77%) or negative image (39%).

QC15.4 Please tell me to what extent you agree or disagree with each of the following statements.

You are happy living in the EU (% - EU)

2 Free-market economy and social protection

- Most think a high level of social protection should go with a free-market economy -

A large majority of respondents agree the **free-market economy should go with a high level of social protection** (83%, +1 percentage point since 2016)¹⁹. In fact, more than one third “totally agree” (38%, +1). Fewer than one in ten disagree (8%, -2).

QC8.2 To what extent do you agree or disagree with each of the following statements?
Free-market economy should go with a high level of social protection (% - EU)

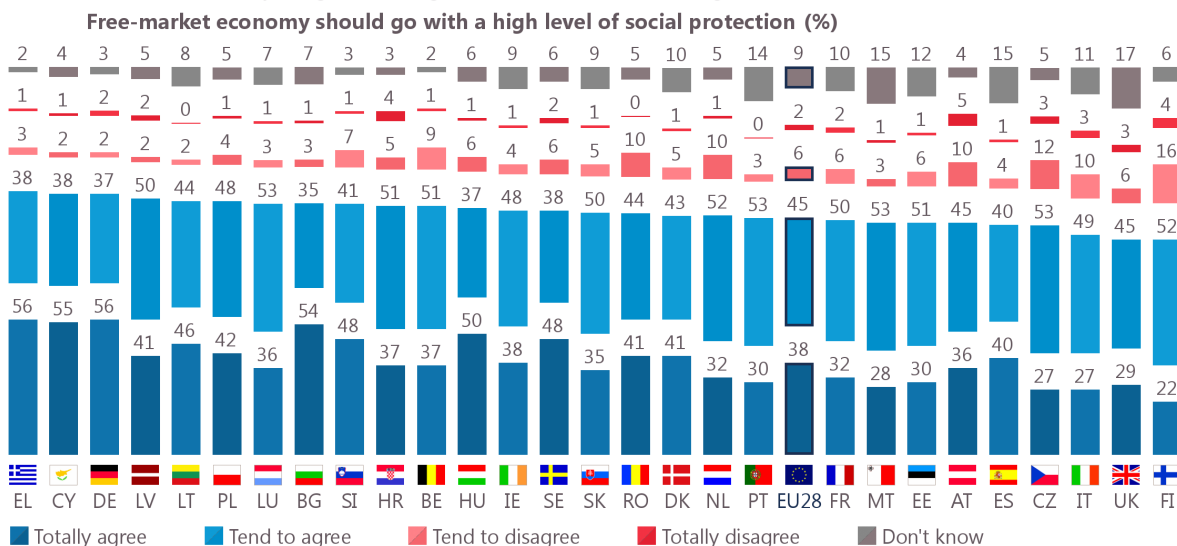

(Sept.-Oct. 2017 - Sept.-Oct. 2016)

¹⁹ QC8.2 To what extent do you agree or disagree with each of the following statements? Free-market economy should go with a high level of social protection.

A large majority of respondents in each EU Member State agree the *free-market economy should go with a high level of social protection*. Proportions range from 94% in Greece and 93% in both Cyprus and Germany to 74% in both Finland and the United Kingdom and 76% in Italy.

At least half of all respondents in Greece and Germany (both 56%), Cyprus (55%), Bulgaria (54%) and Hungary (50%) “totally agree”.

QC8.2 To what extent do you agree or disagree with each of the following statements?

Compared to 2016, there have generally been small or no changes in opinion at a country level, although there are some exceptions. Respondents in 14 Member States of the EU are now more likely to agree, especially in Cyprus (93%, +7 percentage points), Poland (90%, +6) and Romania (85%, +6). They are less likely to do so in six countries, most notably in Malta (81%, -7). No variation in eight EU Member States.

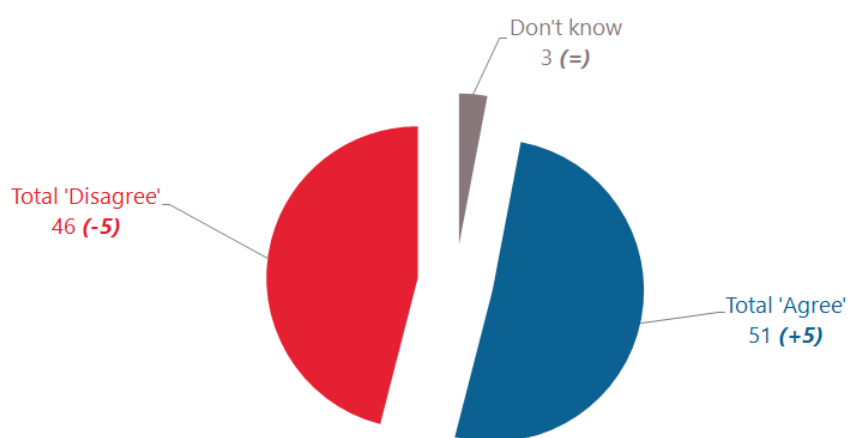

3 Does everyone have a chance to succeed in life?

- A slight majority thinks everyone in their country has a chance to succeed in life -

Just over half of all respondents agree that **in their country everyone has a chance to succeed in life** (51%), with 16% saying they “totally agree”²⁰. More than four in ten (46%) disagree with this statement, and 18% “totally disagree”.

Compared to 2016, agreement has increased by five percentage points, while the proportion who disagrees has decreased by five points.

QC8.7 To what extent do you agree or disagree with each of the following statements?
In (OUR COUNTRY), everyone has a chance to succeed in life (% - EU)

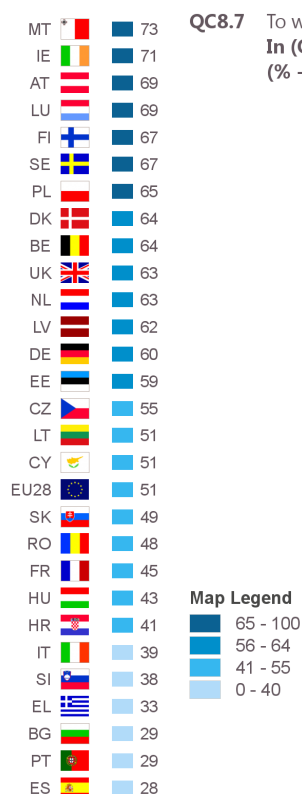

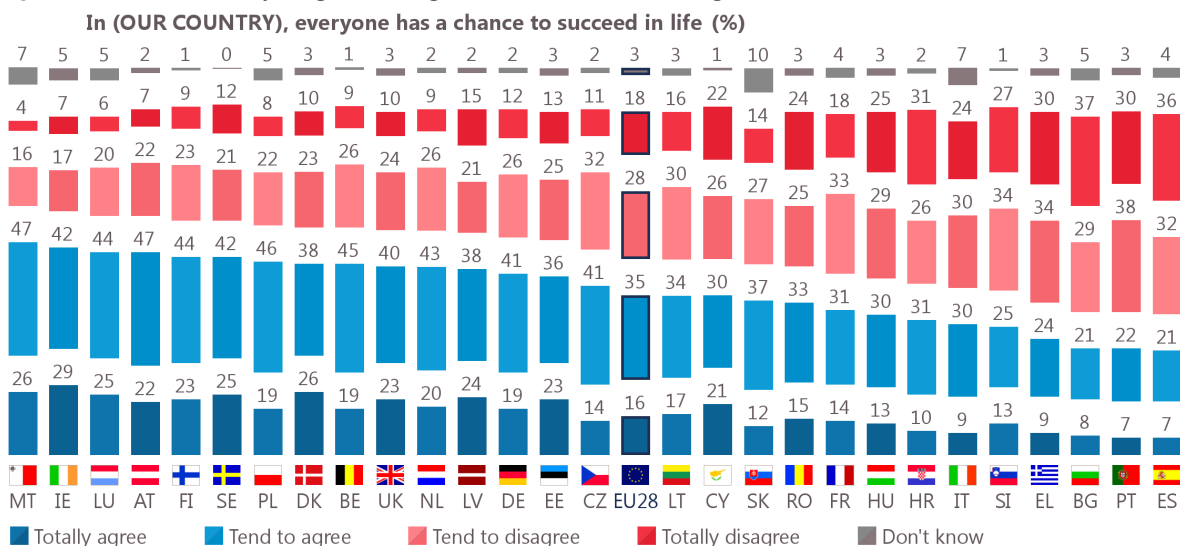

(Sept.-Oct. 2017 - Sept.-Oct. 2016)

Respondents living **outside the euro area** are more likely to agree that *in their country everyone has a chance to succeed in life*, compared to those living within the euro area (58% vs. 48%).

²⁰ QC8.7 To what extent do you agree or disagree with each of the following statements? In (OUR COUNTRY), everyone has a chance to succeed in life.

Opinion about whether *everyone in their country has a chance to succeed in life* varies widely across the EU. In 18 EU Member States, majorities of respondents agree, most likely in Malta (73%), Ireland (71%), Austria and Luxembourg (both 69%). In ten countries, majorities disagree, most notably in Portugal and Spain (both 68%) and Bulgaria (66%).

QC8.7 To what extent do you agree or disagree with each of the following statements?

In 19 EU Member States, proportions of respondents who agree *everyone in their country has a chance to succeed in life* have increased, with the highest increases in Poland (65%, +23 percentage points), Romania (48%, +13), Cyprus (51%, +12) and Austria (69%, +10). The reverse is true for the majority of respondents in six countries, especially those in Sweden (67%, -6). No change in Belgium, Germany and Portugal.

QC8.7 To what extent do you agree or disagree with each of the following statements?

In (OUR COUNTRY), everyone has a chance to succeed in life (%)

The **socio-demographic analysis** shows that:

- Men are slightly more likely to agree than women (54% vs. 49%);
- Respondents who completed their education aged 16 or after (51%-54%) are more likely to agree than those who completed their education at 15 or before (43%);
- Managers are the most likely to agree, particularly compared to the unemployed (57% vs. 42%);
- The fewer financial difficulties respondents experience, the more likely they are to agree: 56% who experience the least difficulties do so, compared to 31% of those who experience the most difficulties;
- Respondents who place themselves higher up the social scale are more likely to agree. For example, 74% in the upper class do so, compared to 45% of those who identify as working class or lower middle class;
- Respondents who are happy living in their country are more likely to agree, compared to those who are not happy (54% vs. 27%).

4 Health and social security: more or less EU decision-making?

- The majority supports more European level decision-making in dealing with health and social security issues -

Respondents were asked if more or less decision-making should take place at a European level across a range of areas²¹. Six in ten respondents (60%) say more decision-making should take place at a European level in **dealing with health and social security issues**, while around one third (32%) think that less EU decision-making should take place in this area. An equal proportion (4%) spontaneously say that no change is needed or that they don't know.

There have generally only been small changes in opinion since 2016. When it comes to *dealing with health and social security issues*, respondents are less likely to be in favour of more European level decision-making (-4 percentage points) and slightly more likely to say the opposite (+2).

QC7 For each of the following areas, please tell me if you believe that more decision-making should take place at a European level or on the contrary that less decision-making should take place at a European level.
(% - EU)

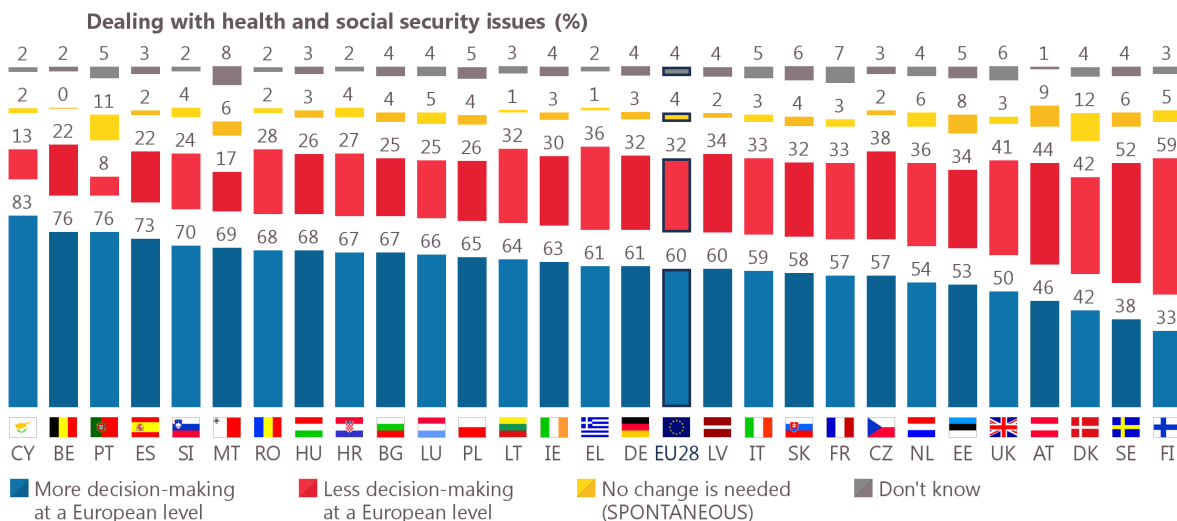

Respondents living **in the euro area** are more likely than their non-euro area counterparts to think there should be more European level decision-making in each of the domains tested. In the case of *health and social security issues*, respondents in the euro area are slightly more likely to think this way compared with those in the non-euro area (61% vs. 57%).

²¹ QC7 For each of the following areas, please tell me if you believe that more decision-making should take place at a European level or on the contrary that less decision-making should take place at a European level; Fighting terrorism; Dealing with health and social security issues; Promoting equal treatment of men and women; Promoting democracy and peace; Securing energy supply; Dealing with migration issues from outside the EU; Protecting the environment; Stimulating investment and job creation.

A majority think there should be more decision-making at a European level in *dealing with health and social security issues* in 25 Member States of the EU, with the highest proportions in Cyprus (83%) and Belgium and Portugal (both 76%). In two countries, a majority think there should be less European level decision-making in this area: Finland (59% vs. 33% for more European level decision-making) and Sweden (52% vs. 42%). Opinion is divided in Denmark (42% vs. 42%).

QC7.2 For each of the following areas, please tell me if you believe that more decision-making should take place at a European level or on the contrary that less decision-making should take place at a European level.

In 25 countries, respondents are less likely to be in favour of more European level decision-making in *dealing with health and social security issues*, with the largest declines observed amongst those in Portugal (76%, -14 percentage points), Luxembourg (66%, -13), Malta (69%, -11), Spain (73%, -11) and Estonia (53%, -11). Respondents are slightly more likely to think so in Bulgaria and Greece. There is no variation in Belgium.

The **socio-demographic analysis** illustrates no notable differences based on gender or education. It does show:

- Those aged 15-24 are the most likely to think there should be more decision-making at a European level in *dealing with health and social security issues* (66% vs. 58% of those aged 55 and over);
- Students and the unemployed are more likely than managers to think there should be more European level decision-making in this area (63-65% vs. 56%);
- Finally, respondents with a positive image of the EU are more likely to think there should be more European level decision-making in this area, compared to those with a negative image (69% vs. 39%).

QC7 For each of the following areas, please tell me if you believe that more decision-making should take place at a European level or on the contrary that less decision-making should take place at a European level.

More decision-making at a European level (% - EU)

	Fighting terrorism	Promoting democracy and peace	Protecting the environment	Dealing with migration issues from outside the EU	Promoting equal treatment of men and women	Securing energy supply	Stimulating investment and job creation	Dealing with health and social security issues

5 Europeans' expectations on social welfare systems

- Almost two thirds are in favour of harmonising social welfare systems within the EU –

More than six in ten respondents (64%) are in favour of **the harmonisation of social welfare systems within the European Union**, with 19% saying they are “strongly in favour” of this idea²². Just over one quarter (26%) are opposed, 9% “strongly opposed”.

Changes in opinion since 2006 are small, with a two-point increase in the proportion who are in favour, and a two-point decline in the proportion that are opposed²³.

QC11 Today, each European Union Member State is responsible for its own social welfare system. To what extent would you be in favour or opposed to the harmonisation of social welfare systems within the European Union?
(% - EU)

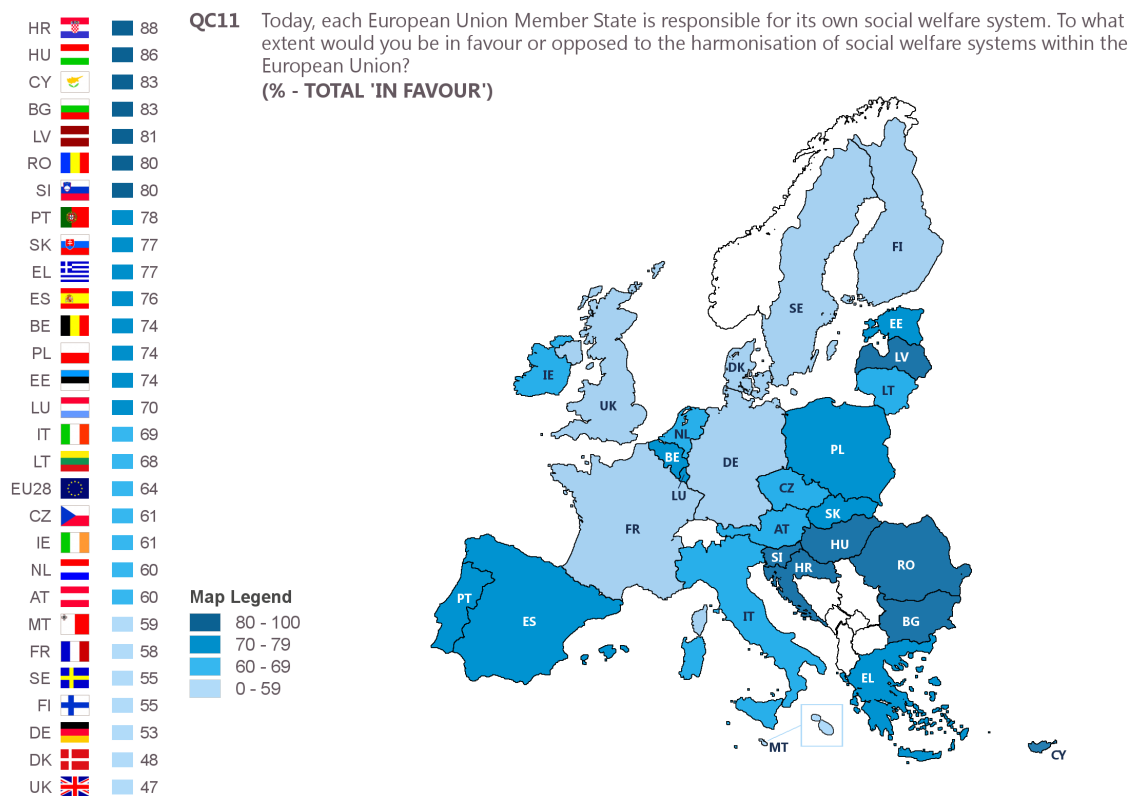

(Sept.-Oct. 2017 - Feb.-Mar. 2006)

²² QC11 Today, each European Union Member State is responsible for its own social welfare system. To what extent would you be in favour or opposed to the harmonisation of social welfare systems within the European Union?

²³ Results from 2006 cover only EU25 countries and do not include Bulgaria, Croatia and Romania.

Opinion varies quite widely across EU Member States, although in all countries majorities of respondents are in favour of *the harmonisation of social welfare systems within the EU*. More than eight in ten respondents in Croatia (88%), Hungary (86%), Cyprus and Bulgaria (both 83%) and Latvia (81%) are in favour of *harmonising social welfare systems*, compared to 47% in the United Kingdom, 48% in Denmark and 53% in Germany.

Across the EU as a whole, there has only been a slight change in the proportion that is in favour of *harmonising social welfare systems across the EU* since 2006. However, at a country level there have been larger changes. In 14 Member States of the EU, respondents are now more likely to be in favour of harmonisation, most notably in Luxembourg (70%, +19 percentage points), Spain (76%, +14) and Slovenia (80%, +12). In 11 countries, respondents are less likely to be so, with the highest decreases in Poland (74%, -12) and the Czech Republic (61%, -11).

QC11 Today, each European Union Member State is responsible for its own social welfare system. To what extent would you be in favour or opposed to the harmonisation of social welfare systems within the European Union?

*This question was not asked in Bulgaria, Croatia and Romania in 2006

The **socio-demographic analysis** shows the following:

- Respondents aged 15-39 are the most likely to be in favour of *harmonised social welfare systems* (67% vs. 61% of those aged 55 and over);
- Respondents who completed their education aged 16 or after are the most likely to be in favour (64%-65% vs. 57% of those who finished aged 15 or before);
- Students are the most likely to be in favour, particularly compared to house persons (70% vs. 61%);
- Those living in large towns are the most likely to be in favour (68% vs. 61% of those living in rural villages);
- In addition, respondents with a positive image of the EU (75%) are much more likely to be in favour than those with a neutral (63%) or negative (41%) view.

QC11 Today, each European Union Member State is responsible for its own social welfare system. To what extent would you be in favour or opposed to the harmonisation of social welfare systems within the European Union?

III. EUROPEANS AND THE FUTURE OF EUROPE

The final chapter of this report focuses on Europe's future. A range of topics are covered, including the prospects for young people in the Europe of the future, and the factors that would be most helpful for Europe's future. Preferences for European society in 2030 are also considered.

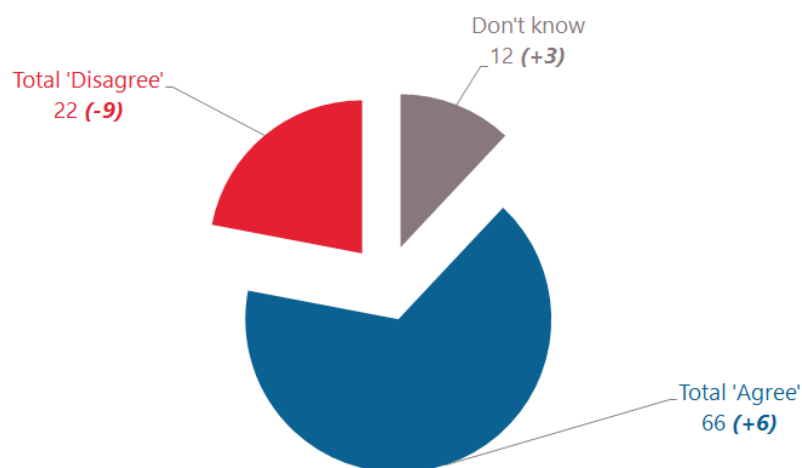

1 Prospects for young Europeans

- Two-thirds of respondents agree the EU project offers a future perspective for Europe's youth -

A large majority of respondents agree **the European Union project offers a future perspective for Europe's youth** (66%), with 21% saying they "totally agree"²⁴. Just over one in five disagree (22%), with 6% saying they "totally disagree".

Respondents are more likely to agree *the European Union project offers a future perspective for Europe's youth* than they were in 2016 (+6 percentage points), and even less likely to disagree (-9).

QC8.4 To what extent do you agree or disagree with each of the following statements?
The European Union project offers a future perspective for Europe's youth (% - EU)

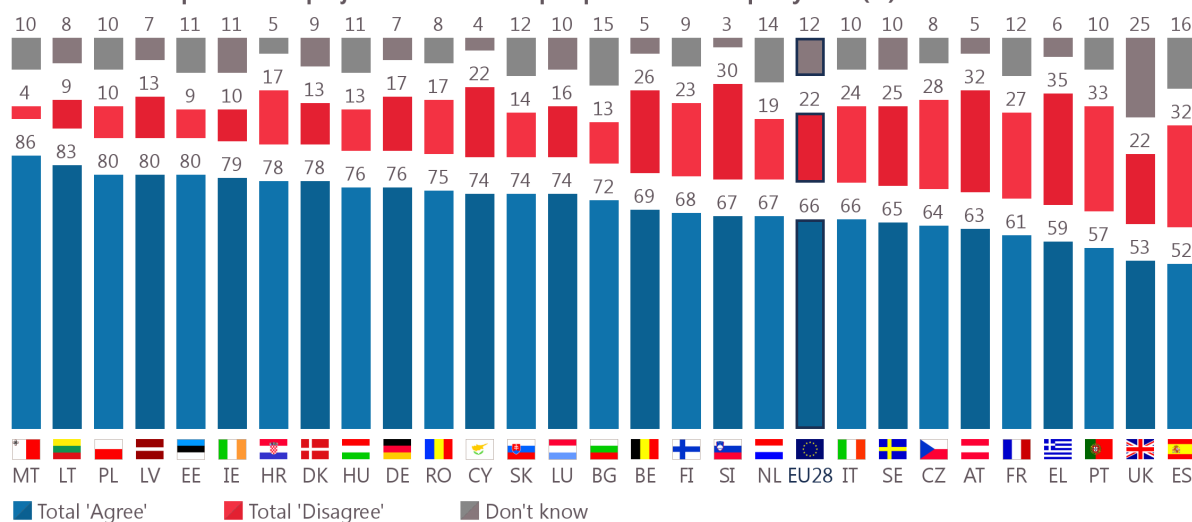

(Sept.-Oct. 2017 - Sept.-Oct. 2016)

²⁴ QC8.4 To what extent do you agree or disagree with each of the following statements? The European Union project offers a future perspective for Europe's youth.

More than half the respondents in each country agree *the European Union project offers a future perspective for Europe's youth*. Respondents in Malta (86%), Lithuania (83%) and Poland, Latvia and Estonia (80%) are the most likely to agree, compared to 52% in Spain, 53% in the United Kingdom and 57% in Portugal.

QC8.4 To what extent do you agree or disagree with each of the following statements?

The European Union project offers a future perspective for Europe's youth (%)

In 20 EU Member States, respondents are now more likely to agree than they were in 2016, and this is particularly the case for respondents in Cyprus (74%, +16 percentage points), Poland (80%, +12), Greece (59%, +12), Italy (66%, +10), France (61%, +10) and Spain (52%, +10). In contrast, respondents in five countries are now less likely to agree, most notably those in Finland (68%, -8). This proportion of agreement remains unchanged in Estonia, Latvia and the Czech Republic.

QC8.4 To what extent do you agree or disagree with each of the following statements?

The European Union project offers a future perspective for Europe's youth (%)

The **socio-demographic analysis** shows:

- Respondents aged 55 and over (64%) are slightly less likely to agree than younger respondents (67%-69% of the 15-54 year olds);
- The longer respondents remained in education, the more likely they are to agree: 73% who completed education aged 20 or after agree, compared to 54% of those who completed their education aged 15 or before;
- Managers are the most likely to agree, particularly compared to house persons (75% vs. 57%);
- The greater the financial difficulties respondents experience, the less likely they are to agree: 68% who experience the least financial difficulties do so, compared to 53% of those who experience the most difficulties;
- In addition, respondents with a positive image of the EU are more likely to agree (82%), compared to those who have a neutral (61%) or negative image (37%).

- A majority think that the life of the young generation will be more difficult than the life of their own generation -

QC9 Generally speaking, do you think that the life of those in the EU who are children today will be easier, more difficult or about the same as the life of those from your own generation?
(% - EU)

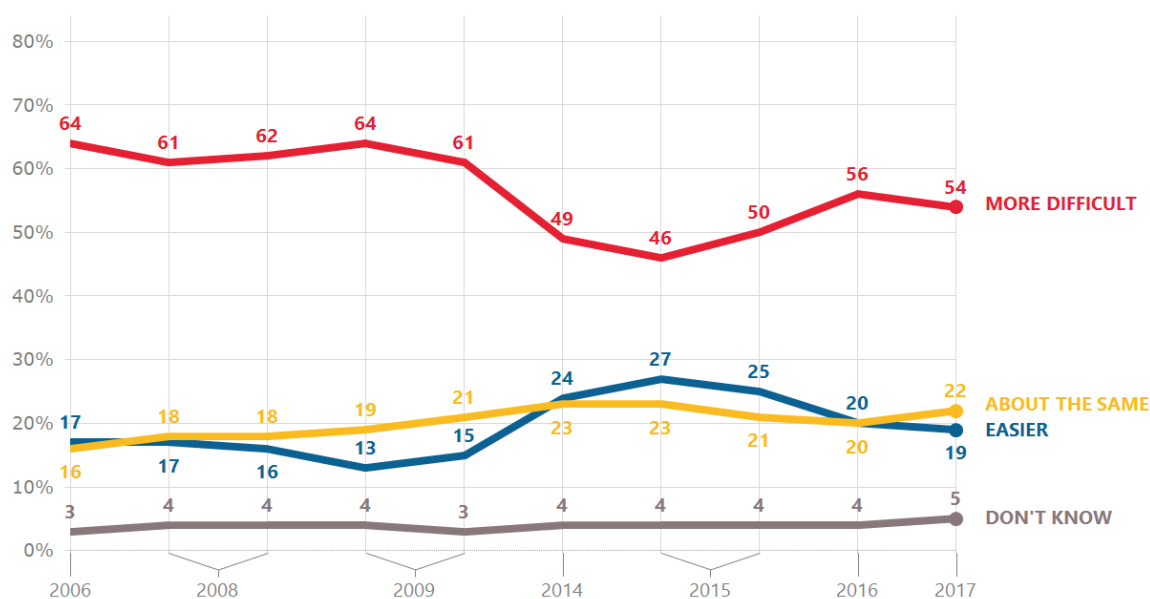

A slight majority of respondents think **the life of today's children in the EU will be more difficult than the life of those from their own generation** (54%)²⁵. This represents a slight decline since 2016 (-2 percentage points). Almost one in five think **life will be easier for the young generation** (19%), a slight decrease since 2016 (-1). The proportion who **thinks life will be about the same** has increased by two percentage points to 22%.

The longer-term trend shows the proportion of respondents who think *life for today's children in the EU will be more difficult than their own generation* remains well below the levels seen between 2006 and 2009. In addition, it is the first time that this proportion has decreased since 2015.

Although the proportion of respondents who think *life for today's children will be easier* has declined since the highs of 2014 and 2015, at 19% it is currently still slightly higher than it was in the period 2006-2009.

QC9 Generally speaking, do you think that the life of those in the EU who are children today will be easier, more difficult or about the same as the life of those from your own generation?
(% - EU)

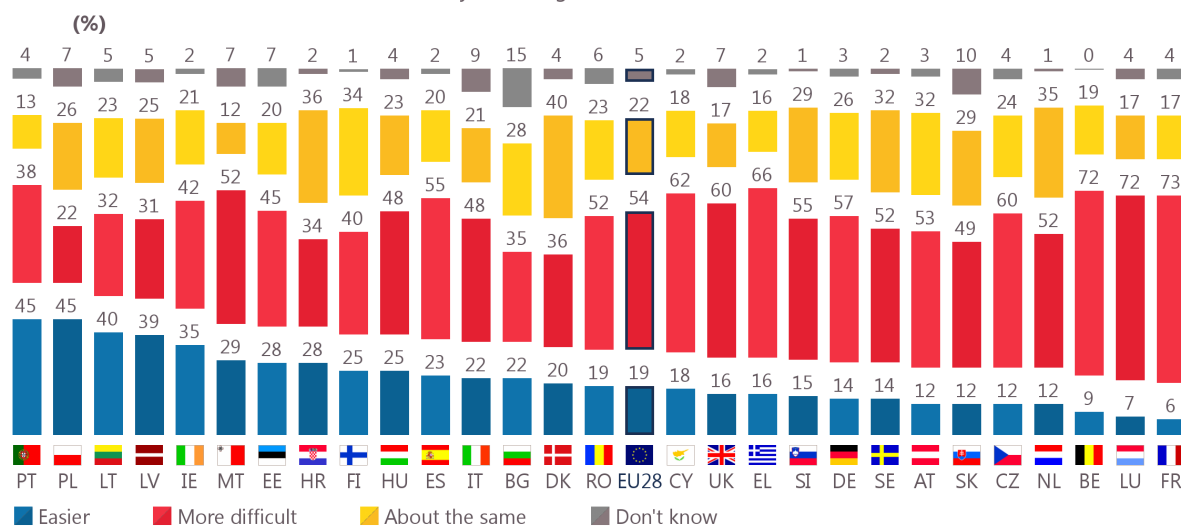

²⁵ QC9 Generally speaking, do you think that the life of those in the EU who are children today will be easier, more difficult or about the same as the life of those from your own generation?

In only four EU Member States, a majority of respondents believe that *the life of children in the EU today will be easier than their own*: Portugal and Poland (both 45%), Lithuania (40%) and Latvia (39%). Conversely, respondents in France (6%), Luxembourg (7%) and Belgium (9%) are the least likely to do so.

In the 22 other EU Member States, majorities consider *life will be more difficult for today's children in the EU*. Respondents in France (73%), Luxembourg and Belgium (both 72%) are the most likely to say so, while those in Poland (22%), Latvia (31%) and Lithuania (32%) are the least likely to share this opinion.

In two countries, majorities think *life for today's children will be the same as their own generation*: Denmark (40%) and Croatia (36%). Respondents in the Netherlands (35%) are also likely to think that way. Those in Malta (12%), Portugal (13%) and Greece (16%) are the least likely to think *life will be the same*.

QC9 Generally speaking, do you think that the life of those in the EU who are children today will be easier, more difficult or about the same as the life of those from your own generation?

At an overall EU level, there have only been minor changes in opinion since 2016, but in some countries there have been larger changes. In 16 Member States of the EU, respondents are now less likely to say *life for children in the EU today will be easier*, most notably in Romania (19%, -8 percentage points), Luxembourg (7%, -7), Ireland (35%, -6) and Malta (29%, -6). In seven countries, they are now more likely to think this way than they were in 2016, with the highest increases in Poland (45%, +7) and Greece (16%, +7). There is no change in France, the United Kingdom, Belgium, Finland and Latvia.

In 16 countries, respondents are now less likely to say *life will be more difficult*, most notably in Poland (22%, -11 percentage points), Greece (66%, -9), the Netherlands (52%, -8) and Spain (55%, -8). They are more likely to think so in 11 EU Member States, especially those in Romania (52%, +9), Malta (52%, +7) and Lithuania (32%, +7). No change is observed in Finland.

In 16 EU Member States, respondents are now more likely to think *life for today's children will be the same*, most notably in Slovenia (29%, +9 percentage points), the Netherlands (35%, +9) and Luxembourg (17%, +7). Decreases are seen in seven countries and this proportion remains unchanged in the five other countries.

QC9 Generally speaking, do you think that the life of those in the EU who are children today will be easier, more difficult or about the same as the life of those from your own generation?

The **socio-demographic analysis** illustrates that in most cases the differences are between those who think *life will be more difficult* and those who think *it will be about the same*:

- The older the respondents, the more likely they are to think *life will be more difficult*, and the less likely they are to think *it will be about the same*. For example, 30% of 15-24 year olds think *life will be about the same*, compared to 19% of those aged 55 and over;
- The longer respondents remained in education, the less likely they are to think *life will be more difficult*, and the less likely they are to think *it will be about the same*: 59% of those who completed education aged 15 or before think *life will be more difficult*, compared to 51% of those who completed education aged 20 or after;
- The unemployed are the most likely to think *life will be more difficult* (62%), while students are the most likely to think *it will be about the same* (36%);
- The more difficulties respondents experience paying their bills, the more likely they are to say *life will be more difficult*, and the less likely they are to say *it will be the same* or *easier*;
- Respondents with a positive image of the EU are more likely to think *life will be easier*, (26% vs. 10% of those who have a negative image), and less likely to think *it will be more difficult* (45% vs. 70%).

QC9 Generally speaking, do you think that the life of those in the EU who are children today will be easier, more difficult or about the same as the life of those from your own generation?

2 What would be most helpful for the future of Europe?

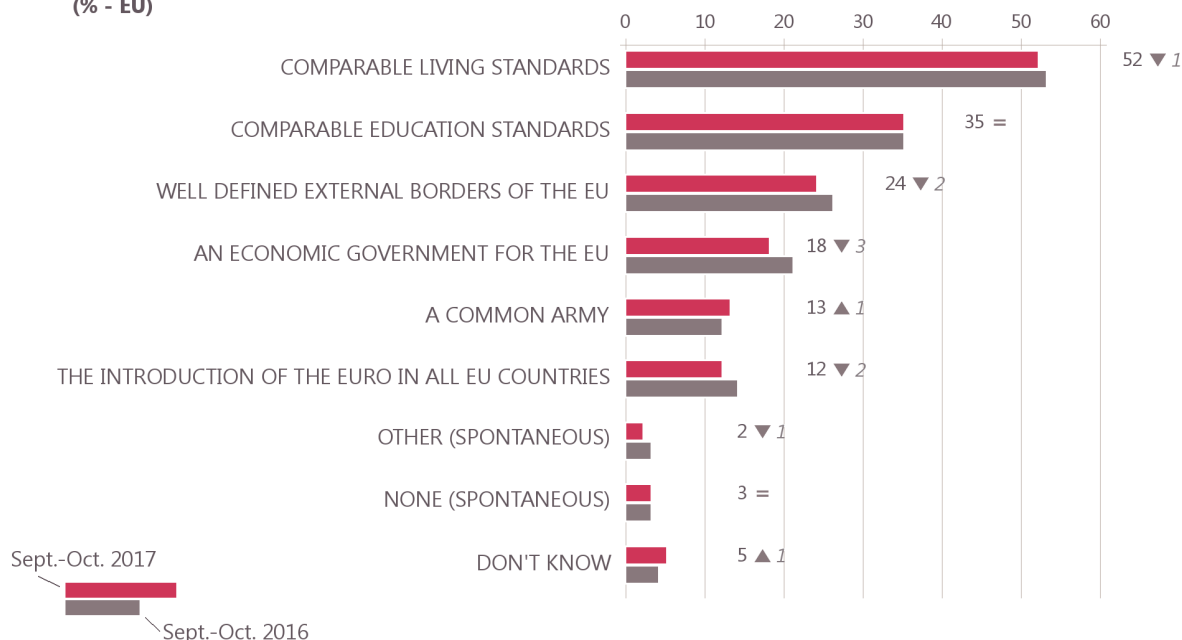

- Comparable living standards considered the most helpful for the future of Europe –

More than half the respondents say **comparable living standards** would be most helpful for the future of Europe (52%), while more than a third says **comparable education standards** would be most helpful (35%).²⁶

Less than one quarter say **well-defined external borders of the EU** (24%), **an economic government for the EU** (18%), **a common army** (13%) or **the introduction of the Euro in all EU countries** (12%) would be most helpful for the future of Europe.

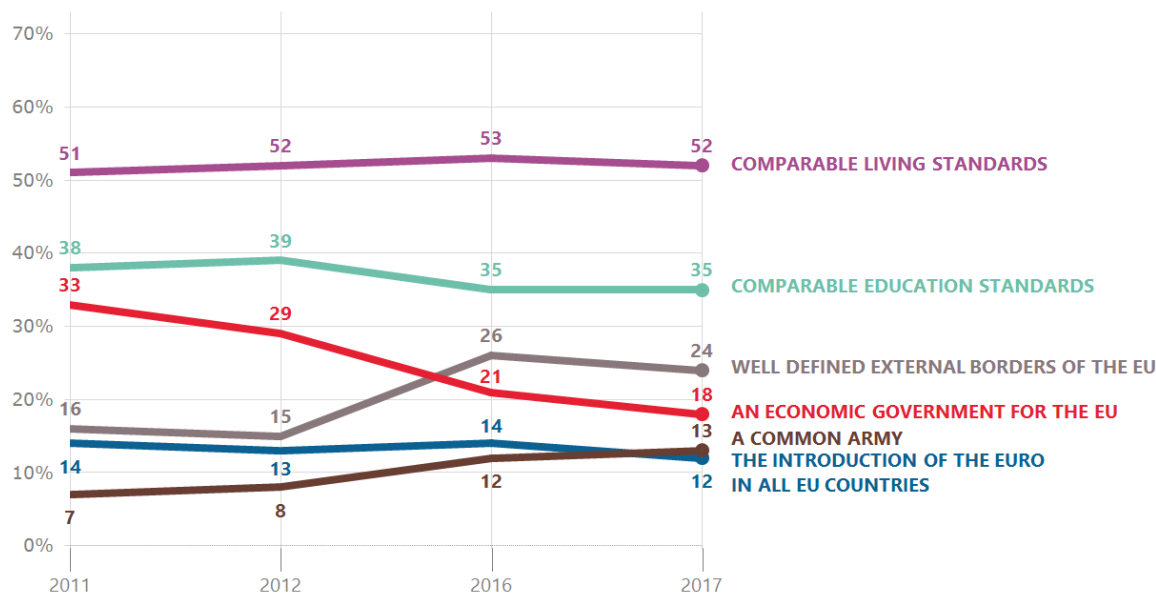

There have been small shifts in opinion since 2016, and the proportions mentioning *comparable living standards* (-1 percentage point) and *comparable education standards* (=) have remained stable.

QC6 Which two of the following would you consider to be most helpful if anything, for the future of Europe?
(MAX. 2 ANSWERS)
(% - EU)

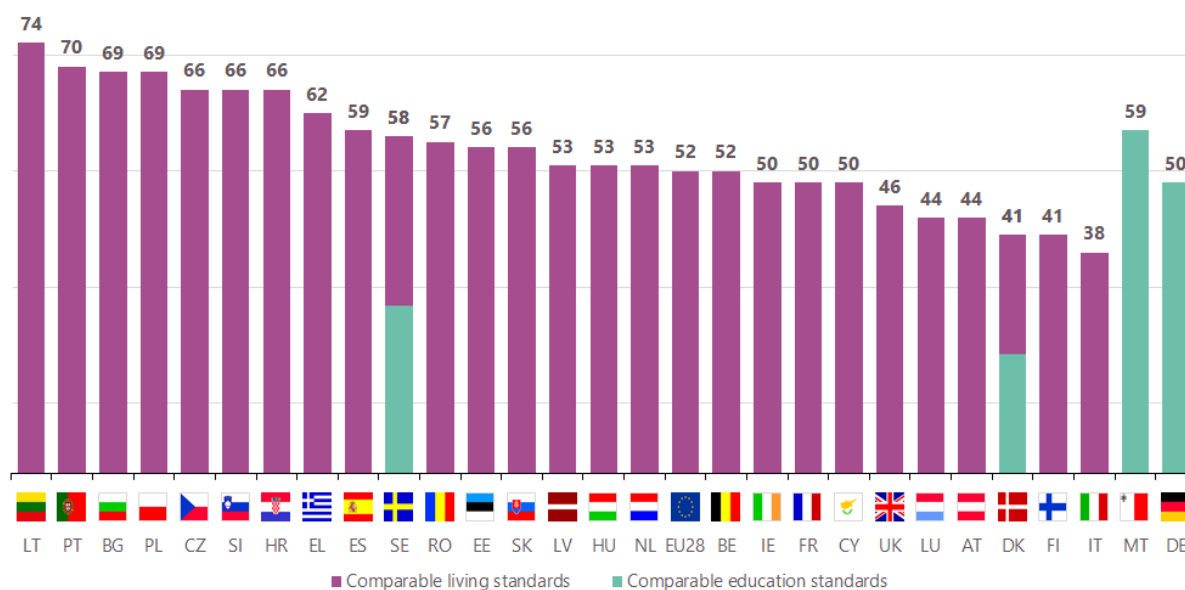

²⁶ QC6 Which two of the following would you consider to be most helpful if anything, for the future of Europe? (MAX. 2 ANSWERS)

QC6 Which two of the following would you consider to be most helpful if anything, for the future of Europe?
(MAX. 2 ANSWERS)
(% - EU)

Comparable living standards are the most mentioned item in 24 Member States of the EU, while in only two EU Member States respondents are most likely to mention *comparable education standards*: Malta and Germany. In Denmark and Sweden these two items are mentioned equally.

QC6 Which two of the following would you consider to be most helpful if anything, for the future of Europe?
(MAX. 2 ANSWERS)
(% - THE MOST MENTIONED ANSWER BY COUNTRY)

In 20 EU Member States, at least half of all respondents say *comparable living standards* would be the most helpful for the future of Europe. At least seven in ten respondents in Lithuania (74%) and Portugal (70%) say this, as do 69% of those in both Poland and Bulgaria. Respondents in Italy (38%) and Denmark and Finland (both 41%) are the least likely to mention *comparable living standards*, although these results still represent more than one third of the respondents in each country.

There are three EU Member States where at least half say *comparable education standards* would be the most helpful: Malta (59%), Sweden (58%) and Germany (50%). Respondents in Hungary (16%) and the Czech Republic and Slovakia (both 17%) are the least likely to mention this option.

Across the EU as a whole, there have only been small changes since 2016, and this is also generally true at a country level as well. There are, however, some exceptions.

In 16 Member States of the EU, respondents are now less likely to mention *comparable living standards*, compared to 2016, most notably in Slovakia (56%, -9 percentage points) and Denmark (41%, -7). They are more likely to say so in eight countries, and no change is observed in four countries.

In 14 Member States of the EU, *comparable education standards* are less likely to be mentioned, especially by respondents in Spain (48%, -13 percentage points), Slovenia (26%, -7) and Denmark (41%, -7). They are more likely to be mentioned by those in 12 countries, most notably in Cyprus (45%, +9). No change in Belgium and Austria.

The **socio-demographic analysis** highlights relatively few differences in opinion:

- The younger the respondents, the more likely they are to think *comparable education standards* would be most helpful for the future of Europe: 41% of those aged 15-24 mention this, compared to 31% of those aged 55 and over;
- The longer respondents remained in education, the more likely they are to mention *comparable living standards* (55% of respondents who completed their education aged 20 or after, compared to 42% of those who completed their education aged 15 or before) and *comparable education standards* (42% of respondents who completed their education aged 20 or after, compared to 27% of those who completed their education aged 15 or before);
- Students (46%) and managers (44%) are the most likely to mention *comparable education standards*, particularly compared to house persons (29%);
- Respondents who experience the least financial difficulties are the most likely to mention *comparable education standards* (39% vs. 29%);
- In addition, respondents who have a positive image of the EU are more likely to mention *comparable living standards* (55% vs. 45% with a negative image) and *comparable education standards* (40% vs. 26%).

CONCLUSION

The importance of solidarity emerges as a key theme throughout these results: the majority of the respondents describe this as a key asset and think the EU embodies this value. Solidarity is also considered to be a key to face global challenges, and the majority prefer a future Europe where solidarity is being given more importance than individualism.

A large majority of respondents are happy with their current occupation, and are happy living in the EU and in their country.

Unemployment and social inequalities continue to be perceived as the main challenges facing the EU, although respondents are less likely to mention unemployment than they were in 2016. These challenges are also reflected in the things respondents think would be most helpful for the future of Europe: comparable living and education standards.

Most respondents continue to support more European-level decision-making in a range of key policy areas, including health and social security issues.

A large majority of respondents think the free-market economy should go with a high level of social protection. More than six in ten are in favour of harmonising the social welfare systems within the European Union.

Turning to the future of the young generation, a majority of the respondents think that the life of the young Europeans will be more difficult than that of their generation. However, the proportion who consider that the European Union project offers a future perspective for Europe's youth has increased since 2016 and is now two thirds of respondents.

TECHNICAL SPECIFICATIONS

Between the 23rd of September and the 2nd of October 2017, TNS opinion & social, a consortium created between TNS political & social, TNS UK and Kantar Belgium, and represented by the Kantar Belgium S.A. coordination centre, carried out the wave 88.1 of the EUROBAROMETER survey, at the request of the European Commission, Directorate-General for Communication, “Media monitoring and analysis” Unit.

The wave 88.1 includes the SPECIAL EUROBAROMETER 467 and covers the population of the respective nationalities of the European Union Member States, resident in each of the 28 Member States and aged 15 years and over.

* It should be noted that the total percentage shown in this table may exceed 100% due to rounding

The basic sample design applied in all states is a multi-stage, random (probability) one. In each country, a number of sampling points was drawn with probability proportional to population size (for a total coverage of the country) and to population density.

In order to do so, the sampling points were drawn systematically from each of the "administrative regional units", after stratification by individual unit and type of area. They thus represent the whole territory of the countries surveyed according to the EUROSTAT NUTS II¹ (or equivalent) and according to the distribution of the resident population of the respective nationalities in terms of metropolitan, urban and rural areas.

In each of the selected sampling points, a starting address was drawn, at random. Further addresses (every Nth address) were selected by standard "random route" procedures, from the initial address. In each household, the respondent was drawn, at random (following the "closest birthday rule"). All interviews were conducted face-to-face in people's homes and in the appropriate national language. As far as the data capture is concerned, CAPI (*Computer Assisted Personal Interview*) was used in those countries where this technique was available.

For each country a comparison between the sample and the universe was carried out. The Universe description was derived from Eurostat population data or from national statistics offices. For all countries surveyed, a national weighting procedure, using marginal and intercellular weighting, was carried out based on this Universe description. In all countries, gender, age, region and size of locality were introduced in the iteration procedure. For international weighting (i.e. EU averages), TNS opinion & social applies the official population figures as provided by EUROSTAT or national statistic offices. The total population figures for input in this post-weighting procedure are listed here.

Readers are reminded that survey results are estimations, the accuracy of which, everything being equal, rests upon the sample size and upon the observed percentage. With samples of about 1,000 interviews, the real percentages vary within the following confidence limits:

Statistical Margins due to the sampling process
(at the 95% level of confidence)

various sample sizes are in rows

various observed results are in columns
